

# Magnesium bolus

**Article number**  
102061

**Dietetic supplementary feed**

**Animal species**  
cattle

**Content**  
12 pieces x 95 g

GMP+ FSA assured  
GMO controlled  
PDV103322

## Magnesium

Magnesium has an important function in the cow's body in conducting stimuli through the nervous system and for good muscle functioning. Magnesium is also important for the energy and protein metabolism because of it influencing the activity of more than 300 enzymes. It is also a vital cation and therefore plays an important role in the acid-base balance of the blood. A magnesium deficiency results in grass tetany. This will be recognisable in cows that have a poorly filled rumen, who suffer stiffness and muscle tremor. In severe cases, grass tetany can be fatal. Grass tetany often occurs in spring when the cows eat young grass containing (too) little magnesium.

## Topro Magnesium bolus

The Topro Magnesium bolus was developed to reduce the risk of tetany. This bolus contains 40 grams of magnesium released gradually over a 4-week period.

## Composition

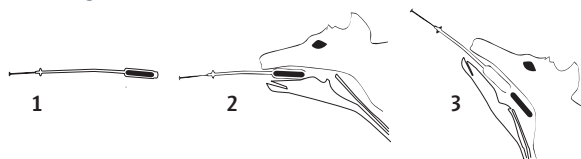

Magnesium oxide, vegetable fat from rapeseed, calcium stearate.

## Storage advice

Keep product cool, dry and out of reach of children. Protect against frost.

## Instructions for use

- Administer 2 boluses upon start pasture season.
- If necessary, administer another 2 boluses after 1 month.
- Do not administer to cows weighing less than 250 kg.

- Administer using an adapted bolus applicator.
- We recommend consulting a nutritionist before use.

## Product characteristics

Magnesium	Quickly replenishes deficits. Necessary for muscle functioning. Necessary for enzyme functioning.
Bolus	Easy to administer. Ensured absorption.
