

For external use on veterinary only

Indications for use

MicroDerm is a protective skin spray. It helps cattle farmers to keep their animals' skin in optimal condition. It is based on micronized copper and zinc chelates (organic) that are rapidly absorbed by the skin.

Dosage

Shake can well before use. Clean the skin surface to be treated and dry it to ensure full contact with the spray. Spray for 3 seconds at a distance of 15-20 cm. Cover the area fully and evenly. There are no known side effects of the product.

Composition

Copper chelate, zinc chelate, butane/propane mix.

Special precautions for the disposal of empty aerosols and residues

Any unused product or waste materials should be disposed of in accordance with national requirements.

Transport information

UN1950 Aerosols, Flammable, 2.1, Limited Quantity.
